

## **bravo™ manual lever hoist**

*Desynchronised brake*

**Desync**

**bravo™**

Bravo™ lever hoists from Tractel® are particularly suitable for tensioning, lifting, handling and traction operations, with optimum safety thanks to exclusive desynchronised pawls preventing any unintentional release of the load. Range from 0.5 tons to 9 tons.

# bravo™ manual lever hoist

Desynchroised brakes

## SAFETY:

- Permanent load control
- Automatic load brake closure.
- Load limiter available as an option

## EFFECTIVENESS:

- Optimised safety against unintentional release of the load thanks to the two independent desynchronised pawls.
- Free wheel system / neutral position: fast and easy pull through of the load chain.
- Wide range: capacities from 500 kg to 9 t.

## TECHNICAL SPECIFICATION:

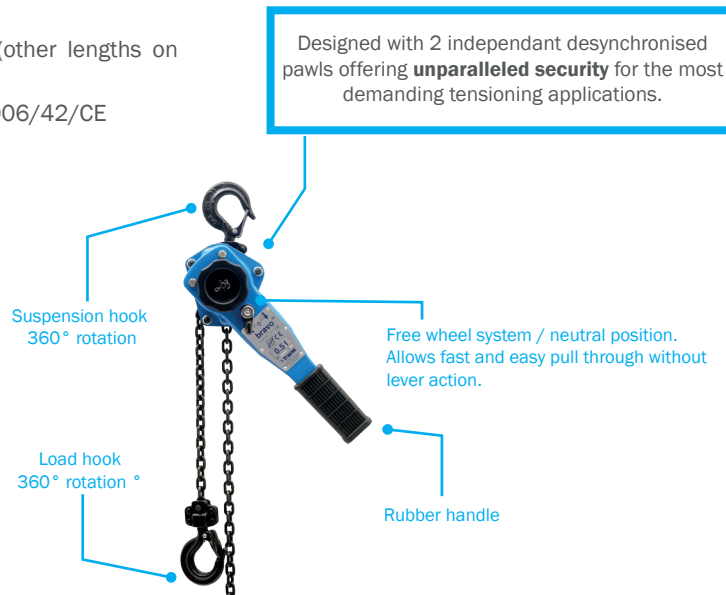

- Capacity (WLL): 500 kg to 9.000 kg
- Corolim® chain
- Standard chain length: 1.5m - 3m (other lengths on request)
- Compliance with Machine Directive 2006/42/CE
- EN13157 + A1:2009 conformity

## HIGH QUALITY FINISH:

- Roller and block chain guides ensuring a smooth chain action through the hoist.
- Galvanised fittings, epoxy paint for much greater resistance to aggressive environments.
- Forged steel hooks with 360° rotation and overload opening indicators

## ERGONOMICS:

- Compact with a light weight simplifies use and transport.
- Rubber handle improves grip.

## SPECIFICATIONS:

Model	WLL (t)	Number of falls	Dimensions of chain Ø x P	Lifting height (m)	Weight (kg)	bravo™ hoist, lifting height 1.5 m Corolim® chain	bravo™ hoist, lifting height 3 m Corolim® chain
bravo™ 0.5 t <i>desync</i>	0.5	1	5 x 15	1,5	5	244029	244099
bravo™ 0.75 t <i>desync</i>	0.75	1	6 x 18	1,5	7	244039	244109
